INTERCULTURAL MENTORING PROGRAM

ICM is a mentoring program that aims to help new international students by connecting them to personal, individual relationship as a way to help them integrate quickly into our academic and social system.

We have been around every winter term since 2017/18. We're a rapidly growing program. More than 900 mentors and mentees have already benefited from the subject-specific support!

Intercultural
Mentoring

Moving to another country and adjusting to a new complex university environment can be challenging. Most of our mentors know this because they have gone through the same process themselves. They will be happy to assist you in finding new friends, getting adjusted to the new academic system, and giving you orientation in a new country.

Mentees are international students from all over the world who start their studies at the university of Freiburg and who aim to get help in their studies and everyday life. ✨

WHY YOU SHOULD GET INVOLVED:

What's in it for ICM mentees?

- Meet (international) students from all over the world and quickly get settled in Freiburg
- Receive (subject specific) support for all your questions concerning your studies and everyday life in Freiburg
- Upgrade your curriculum vitae with a certificate recognizing successful participation as a mentee
- Improve your language skills
- Actively work within a great program at the university

Crafting, Christmas party,
Workshops, Etc.
- Tips & Tricks
- Closing Event
- + More!

“Initially I joined this program to know more people and their culture, but as the program progressed, I realized that it is much more than just knowing people. My mentor-mentee relationship is much more fruitful than imagined because we talk quite often. I get tips and advice on various difficult topics... I will recommend it to all the students because I was able to make a friend in Freiburg while being in India, all because of this program!”

“... I really appreciate this program because it gives international students a comfort and warm way to socialize with other students. I'm happy to be a part of it!”
